

Only the best is always safe.

ON GUARD ACID SPOT'R™

A translucent yellow spray that immediately turns purple upon contact with small drops of acid pH 2.6 or lower. This is a water soluble product used for the detection of accidental spills or leaks of acids.

Use whenever an acid spill or leak is suspected. It is used to determine the perimeter of the spill or to confirm the isolation, repair, and neutralization of a leak. Use this product before coating a potentially contaminated surface or to ensure clean up has been adequately completed.

Available in a 16oz pump spray bottle

RTY Neutralizer™

A solution that has a pH of 11.5 that can be used to neutralize an acid spill or leak. Aids in expediting the transition from activated RED back to neutral Yellow after a leak occurs and has been isolated and repaired.

Available in a 8oz pump spray bottle

Use to DETECT and NEUTRALIZE

Hydrofluoric Acid
Oxalic Acid
Formic Acid
Hydriodic Acid

Trifluoroacetic Acid
Chlorine
Sulfurous Acid

Hydrochloric Acid
Hydrobromic Acid
Maleic Acid

Citric Acid
Sulfuric Acid
Fluorosilicic Acid

Phosphoric Acid
Perchloric Acid

Glacial Acetic Acid
Nitric Acid
Chloroacetic Acid

In areas such as

Truck Tankers
Hand-tools
Welds

Rail Cars
PPE
Valves

Laboratory Surfaces
Tanks
Secondary Containment

Pipes & Weep Holes
Pump Seals
Floors under piping
