

Series 37G

- ▶ Fits inside pipe I.D.
- ▶ Fastened with internal expansion clamp
- ▶ Features all-elastomer, maintenance-free design
- ▶ Is custom-built to customer specifications
- ▶ Closes on entrapped solids

Materials of Construction:

- ▶ Valves are available in pure gum rubber, Neoprene, Hypalon®, Buna-N, Viton® and EPDM
- ▶ Stainless steel expansion clamps

The Series 37G Inline Check Valve was developed specifically for installations where clearance below the invert of a pipe is insufficient to clear the flange of the standard Series 37. The 37G effectively has a zero face-to-face dimension since it can be completely slipped into an existing pipe. Piping modifications are not required to provide space for the valve. The Series 37G design uses the slip-on principle in reverse.

A special clamp that expands outward is provided to secure the valve to the inside of a pipe, enabling the valve to be installed easily on the outlet pipe from a manhole, such as in a CSO system.

The pressure drop of the Series 37G is increased because of the smaller I.D. required to fit the check valve in the line. Tideflex® Technologies recommends the valves be pinned to the pipe. Each clamp has four pre-drilled holes to allow installation of anchors/bolts. Contact our engineering staff for additional information.

Dimensions Series 37G Check Valve

Nominal Size* (Pipe I.D.)	Length L	Height of Bill H	Max. Backpressure (psi)	
			Standard Tideflex®	With Saddle Support
